## GEOPROSOIL

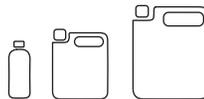

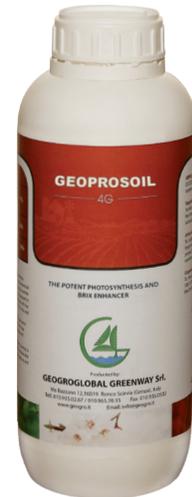

GEOPROSOIL removes sodium from the root zone. Removing sodium from the root zone minimizes soil compaction, and allows for greater germination and root development.

### CHARACTERISTICS:

- Release the sodium adsorbed on colloids of the soil to be washed by water of irrigation.
- Protect the plant from negative effect of salinity thank to organic acid.
- Decrease the water salinity. It corrects and prevents against Calcium deficiency.

### COMPONENTS:

	w/v
Nitrogen (N) .....	2%
Calcium Oxide (CaO) .....	3%

**PACKAGING:** 1 L, 5 L, 20 L

		CROP	PERIOD OF APPLICATION	DOSE
<b>DIRECTION FOR USE</b>	FERTIGATION	FRUIT CROPS (STONE FRUIT, CITRUS, TABLE GRAPE)	Total of 20L / ha / year	4-5 L/ha first irrigation
		VEGETABLES (CUCUMBER, ZUCCHINI, EGGPLANT, PEPPER, TOMATO)	Total of 8-16L / ha / cycle	4-8 L/ha first irrigation
		ROW CROPS (WHEAT, MAIZE, OIL SEED RAPE, SUNFLOWER, SOYBEAN, RICE, SORGHUM)	Total of 8-16L / ha / cycle	4-8 L/ha first irrigation
